

NEW HIGH RESOLUTION GRAND FORMAT PRINTING AVAILABLE INTRODUCING THE FIRST OF ITS KIND IN THE US

Today the first true extremely high-resolution 6- color grand format 16 foot wide roll to roll printer was delivered to Duggal Visual Solutions, Inc. This new UV printer will provides us with the ability to produce in-store window banners, billboards, and fabric murals at a speed and quality level that was previously impossible. The high precision of the carriage system, the linear motor drive technology and the enhanced Quadro Array Technology with 2048 nozzles per color, achieves optimum print quality with high productivity. This highly intelligent printer has built in sensors and a uniquely design media transport system.

To coincide with Duggal's green initiative this printer will also be added to our Ecolmaging line of printing options. With its VOC (Volatile Organic Compound) free UV inks and accredited Nordic Swan certification it meets the most stringent environmental requirements. Unlike existing UV printers in the market today this UV machine prints banding free and without the ink odor prevalent on other platforms.

In addition to being the highest quality 16 foot wide printer in the industry it also has the ability to print with white ink. This outstanding capability allows for a larger range of visual options by extending your material choice into colored base fabrics and vinyl.

Duggal Visual Solutions, Inc. is proud to be the first company in the United States with this revolutionary new technology.
